Mr. Don Hartsell
Commissioner, World Air League

Dear Don,

On behalf of MacGillivray Freeman Films, we are thrilled to commit to collaborating with you and the World Sky Race Team on providing a film and educational materials that will enlighten and inspire children worldwide about environmental science. Our team is excited about the opportunity to contribute to such a meaningful initiative that aligns perfectly with our values and mission. We believe that educating the next generation about environmental issues is crucial for creating a more sustainable future, and we are dedicated to making a positive impact through this partnership.

Furthermore, we are eager to work alongside other foundations that share our vision and mission. By working together, we can amplify our efforts and reach even more young minds, empowering them to become environmental stewards and change-makers. We are committed to leveraging our resources and expertise to make a lasting and meaningful difference in the lives of children around the world. Together, we can inspire a new generation of environmental leaders who will help protect our planet for generations to come.

MacGillivray Freeman Films has been committed to the environment for over 40 years. Our films and educational initiatives help people of all ages expand their learning on topics showcased in our documentaries. *Dolphins* (Academy Award nominee), *Great Barrier Reef*, *Hurricane on the Bayou*, and *The Living Sea* are a few examples of initiatives we have produced on the environment that combine an IMAX film with supporting educational materials which have impacted more than 100 million people. We are currently producing a film on climate change that we expect to release in early 2026. We are committed to environmental science education and working with your team on the World Sky Race is exciting! I am delighted to lead this charge for MacGillivray Freeman Films and work with you and your team.

Embrace the Race!

Shaun MacGillivray
President
